

DUMPER TS 7000

Easy to operate and smooth running.

It offers quality results, high productivity and operator comfort. It has the advantage that it complies with health and safety requirements while working in confined areas. It can transport up to 300M³ of concrete per day. The **Dumper TS 7000** enables contractors to discharge concrete fast, with no effort and virtually no sub base disturbance. The Concrete Dumper is built tough and the most powerful on the market.

Best solution for concrete transport on job site

Main advantages

- Standard components
- Boosting productivity and speed
- Fault diagnostics system
- Centralized lubrication
- Hydraulic washer
- Easy to transport [Standard size]
- Powerful and eco friendly solution

Technical description

Engine	
Brand	DEUTZ
Model	TCD 2013 L42V
Emission compliance	EU Stage 3A / US EPA TIER 3
Power	129 Kw @ 2300 RPM
Torque	670 nm @ 1600 RPM
Fuel	Diesel

Specifications	
Width	2,5 m
Length	7,6 m
Height	2,6 m
Empty Weight	9 tons
Bin capacity	5 m ³
Wheel steering	2 - 4 wheels / Crab
Transport dimension	Standard

Health & environment	
Catalytic - DOC	Yes
Diesel particulate filter - DPF	In option
Eco oil	In option
Safety accessories	Yes
